**REGISTRATION DEADLINE IS NOVEMBER 3, 2017**
THE PROGRAM and OBJECTIVES

The purpose of this course is to present direct and indirect bonding restorative options based on a minimally invasive approach. Principles, materials, and clinical techniques will be outlined to help the clinician achieve excellent esthetics, function and affordable solutions while preserving natural tooth structure. Topics to be covered include:

- Cariology and Minimally Invasive Dentistry
- Introduction of Adhesion
- Adhesion types
- Teeth Whitening
- Update in Light Curing Science
- Shade Selection and Smile Analysis
- Current Classification of Dental Composites
- Direct Anterior Dental Composite Build-Up Techniques and Applications
- Material for Indirect Restorative Procedures

At the completion of this presentation, participants should be able to:

- Understand minimally invasive concepts and cariology;
- Incorporate the concepts of tooth structure conservation into daily practice;
- Understand the keys to be able to achieve long-term and aesthetic direct restorations;
- Incorporate new concepts of light curing, dental adhesives and resin based composite materials into your practice; and
- Select and apply the best adhesive and direct restorative materials and techniques in anterior and posterior teeth to produce long-lasting esthetic and functional resin composite restorations.
