THE PROGRAM AND OBJECTIVES

The course will define and describe connections between sleep medicine, dental sleep medicine, and sleep dentistry. Physicians will describe sleep medicine principles and new technologies for treatment and understanding of sleep disordered breathing. Dental sleep medicine will be positioned in relation to sleep medicine. Sleep dentistry will be defined and treatment planning, integration with occlusion and TMD will be explained. The importance of the airway in restorative dentistry will be illustrated.

At the completion of this presentation, the participants should be able to:

• Understand the relationships between sleep medicine physicians and dentists required to provide dental sleep medicine care;
• Demonstrate communication required for delivery of dental sleep medicine care;
• Describe how to integrate dental sleep medicine into personalized care and recommend alternative therapies for obstructive sleep apnea; and
• Explain how to treatment plan and sequence dental sleep medicine care.
