ENDODONTIC SUMMER FELLOWSHIP

Dates will be announced shortly

DEPARTMENT OF ENDODONTICS
UNIVERSITY OF IOWA
COLLEGE OF DENTISTRY

Endodontic Dental Externship Program for dental students.

The purpose of this externship program is to increase the student’s knowledge of the scope of Endodontic treatment. During this externship, the student will be exposed to the specialty of Endodontics at the undergraduate and graduate levels. The experience will involve treatment of patients with emphasis on Endodontic needs requiring treatment and completion while the undergraduate clinic enters a six week break.

Activities will include:
1. Direct patient care (limited to Iowa students)
2. Participate in Endodontic Graduate Program education seminars
3. Endodontic Journal Club
4. Observe and Assist Endodontic Residents in complex and surgical cases
5. Treat an advanced endodontic case with one-on-one resident observation
6. Visit Endodontic Private Practices (Group and Individual)

This program is available to dental students who have successfully completed the third year of the dental curriculum and will be limited to 3-4 students. An application can be obtained from the Department Staff, Gina Pottorff or Lisa Harless, in room W-343. Two letters of recommendation from College of Dentistry faculty members are required. Email addresses are: gina-pottorff@uiowa.edu and lisa-harless@uiowa.edu.

We regret that we can only accommodate a limited number of students. Should more than 3-4 equally qualified applicants exist; the positions will be filled by department selection.

Please be advised that although this experience would be valuable to anyone interested in making the decision to pursue advanced education in Endodontics, it is certainly not required for application to the graduate program at Iowa, and will not guarantee automatic acceptance to the program.
