Polycrystalline and low glass ceramics

alumina, zirconia, Procera, Cercon, Lava, ZirCad

Try in

Light sandblasting* 10 PSI 50 micron

Rinse or Steam clean

Dry

Retentive prep

Cement

TOOTH

Pumice

Rinse

Dry

Luting cement

Clean up

Non retentive prep

Bond

MDP containing ceramic primer

Adhesive

Air dry + thin

Light cure 20s

Resin cement

5 sec cure

Clean up

20 sec cure each surface

TOOTH

Pumice

Rinse

Dry

Etch enamel 15 sec

Dentin quick etch

Rinse

Dry to leave moist

Adhesive

Air dry + thin

Light cure 20s.

* Controversial (good for bonding - may affect strength)
